Brief: Streamer Leaderboard Landing Page

Overview

We are creating a **standalone promotional Landing Page** for streamers/influencers that allows them to showcase a **wagering leaderboard tied to giveaway campaigns**.

This is **not a game page**, but a campaign-focused promotional leaderboard designed to drive engagement and wagering activity.

We will start with **LD** as phase 1.

A prototype has been created and is attached for reference.

  - Prize Structure & Leaderboard Mechanics
    - Eligibility
    - 1st Prize – Turnover Unlock Mechanism
    - Margin Protection
    - Prize Structure
    - UX & Display Options
    - Prize Visibility
    - Unlock Transparency (Optional Feature)
    - Strategic Value

Objective

- Boost player engagement driven by influencer giveaways
- Increase wagering volume during leaderboard periods
- Provide a transparent and visually engaging leaderboard experience
- Enable influencers to easily promote competitive wagering events

Locales

Phase 1:

- **LD:** AUS / NZ

Future scope:

- **JC, LO**: AUS / NZ
- **VN**: AUS / NZ / DE

Deliverable

- Standalone promotional **Leaderboard Landing Page**
- Hosted on a domain separate from the main brand domain
- Shareable link for influencers

Functional Requirements

Leaderboard Logic

- Ranking sorted by highest total wagering during the campaign period
- Defined campaign period (typically monthly)
- Display **Top 10 players only**
- Show:
  - Username (if unavailable, display masked Player ID showing only the first and last digits)
  - Total wagering amount
- Data refresh: every 15 minutes
- Optional: countdown timer showing time remaining

Page Structure & Sections

Header / Top Bar

Left:

- Streamer avatar
- Streamer name

Center:

- “Presented by”
- Prominent Lucky Dreams logo

Right:

- Primary CTA: **Join Now** (visually dominant)
- Secondary CTA: Log In

Optional: Sticky header

Hero Section

Headline:

Streamer’s Wager Race
Win Exclusive Prizes!

Subheadline:

How it works

Purpose:

- Immediately communicate competition
- Emphasize rewards and urgency

How It Works (4 Steps)

Displayed as:

- 4 cards (desktop)
- Stacked (mobile)

Steps:

1. Register – Quick registration process
2. Deposit – Fast and effective
3. Play – Sit back and enjoy
4. Climb the Leaderboard & WIN!

Top Winners Section

Visual highlight section.

Display:

- Top 3 leaderboard positions

Design:

- 1st place centered, larger, gold glow, crown icon
- 2nd & 3rd slightly smaller

Each card shows:

- Username or player ID
- Wagered amount

Current Leaderboard Section

Title:

Current Leaderboard
Ends in XXXXX (dynamic countdown)

Table columns:

- Rank
- Username
- Wagered Amount

Display top 10 only.

Footer

Links:

- Terms & Conditions
- Privacy Policy
- 18+ Play Responsibly

Social icons:

- Facebook
- Twitter / X
- YouTube

Prototype

Design File

Figma Password: bl00mLD

Additional Requirements & Technical Specifications

Domain Structure

- Domain structure proposed: luckydreams.club/streamernamestreamer
- Each streamer will have a **unique URL path**, enabling:
  - Custom branding (avatar, name, visuals)
  - Streamer-specific tracking (STAG inclusion in CTAs)

Data Refresh & Timestamp Requirements

- Leaderboard data must refresh **every 15 minutes**.
- The page must display:
  - **Last Updated:** (based on the last successful API fetch)
  - **Next Update:** (calculated 15 minutes from last successful update)
- The "Next Update" time must be displayed in the **user's local time zone**.
- If API read fails:
  - The previous successful dataset remains visible.
  - The "Last Updated" timestamp should only change when the API successfully returns new data.

Dynamic Page Elements (Streamer-Specific)

The following elements must support dynamic configuration per streamer:

Primary CTA – "Join Now"

- CTA must include **streamer-specific STAG parameter**
- Each streamer will have a unique tracking link
- Example: https://brand.com?stag=XXXXX

Streamer Data

- Avatar
- Streamer Name
- Potentially custom headline text (if required in future)

Countdown Timer

- Dynamic end date/time per campaign
- Displayed in user's local time zone

Leaderboard Data Integration

- Leaderboard data will be obtained from an **external API**.
- Authentication method: **Basic Auth**.
- The API will provide:
  - Username (or Player ID)
  - Total Wagered Amount
  - Ranking order (or raw data to be sorted)
- Only **Top 10 players** will be displayed.

Perfect — below is the **updated section** you can add to your existing brief under something like **"Prize Structure & Tournament Mechanics"** for the standalone promotional landing page.

This keeps it clean, strategic, and aligned with margin control.

Prize Structure & Leaderboard Mechanics

Eligibility

- Tournament is for **NEW players only**
- Option to apply a **minimum deposit threshold**
  - Only players above this threshold are eligible
- Players must be notified via **email upon enrollment**

1st Prize – Turnover Unlock Mechanism

- A **turnover limit** will be set for the 1st prize (e.g., 1K wager amount).

- If the turnover limit is **not met**:
  - The 1st prize will **not be guaranteed**
  - The highest wagering player will receive the 2nd prize instead
- This condition must be clearly defined in the **T&Cs**

Margin Protection

- No need to add fake players if turnover unlock is clearly stated in T&Cs.
- Faking a 1st prize winner remains a **last-resort option only**, if absolutely required to avoid an unintended payout scenario.
- **Claudio & Alessandro** will define a safe turnover limit before each tournament.

Prize Structure

- **1st Prize**
  - High-value prize
  - Unlocked only once turnover limit is reached
  - Winner name displayed only after unlock condition is met
- **2nd & 3rd Prizes**
  - Lower-value prizes
  - Subject to T&Cs
  - Always awarded based on ranking
- **Cash prizes**
  - Reserved only for influencers/streamers who have already proven value

UX & Display Options

Prize Visibility

- Prizes to be shown:
  - In title/subtitle
    OR
  - In a dedicated banner section with prize imagery

Unlock Transparency (Optional Feature)

- Display:
  - “X points left to unlock 1st prize”
- Option to display “wagered” as **points**
  - Improves perception and psychological framing
  - Still calculated based on wagering logic internally

Strategic Value

- Drives competitive wagering behavior
- Encourages higher turnover to unlock premium rewards
- Protects margins through conditional prize guarantees
- Avoids artificial leaderboard manipulation
- Creates scalable influencer-led engagement campaigns
